

“What She Wants...”

BEAUTY by Atlas Aesthetics

Atlas Aesthetics provides high-quality, personalised care in a comfortable and service-oriented environment.

Take your pick from pampering treatments such as the Illumira Peel (a combination of Qs-Nd:YAG Laser and Chemical Peel); and Radiofrequency with ESWT (extracorporeal shockwave therapy) for slimming and firming.

So what makes these skin and body treatments so effective? ESWT reduces stubborn fats and cellulite, and Radiofrequency is used to uplift facial and body tissues which firms and tightens skin. The Qs-Nd:YAG Laser is used to treat dermal and epidermal pigmentation as well as skin rejuvenation. To enhance the overall result, it is recommended that you also undergo a chemical peel with the Qs-Nd:YAG Laser.

Enjoy a complimentary limo ride home after your Fractional CO2 laser skin treatment session (the first clinic in Singapore to offer this!)

Enjoy a complimentary limo ride after your Fractional CO2 Laser skin treatment session.

Special Offers For You!

Enjoy 10 sessions of ESWT and 5 sessions of Radiofrequency for just \$1,999 (UP: \$ 3,500). You also get 50 per cent off for the first trial of other treatments at Atlas Aesthetics.

*The ESWT (extracorporeal shockwave therapy) treatment involves using “shockwaves” to physically break up fat, which is then removed via our body’s lymphatic system by natural physiological processes.

*Radiofrequency is used for body contouring and improvement of body figure through the use of high frequency waves and heat energy that penetrate into tissues.

Terms & Conditions: This offer is valid until October 31, 2009. Prices are before GST.
